

**Name:** Henry Våg

**Pair:-**

**Amount of completed tasks: 10**

**Which tasks were left undone or incomplete: 0**

**Self-assessment:**

I did a good job with most of the exercises except for the last one, which was a struggle.

Answers to other than coding tasks here:

### **Part 1**

#### **3.1**

Encapsulation – Limiting access to a class's attribute data and implementation details

Client – Creates instances of an object and interacts with them

Data attributes – Variable that holds data within an instance of a class

Instance – The realization of a class, an object created from a class i.e Class car -> car
